OUR HISTORY

PEG is a flexible and experienced multi-sector Contractor, which operates on behalf of Private and Public Companies in the design and implementation of technological plants in the **Energy Sector (Oil & Gas upstream, Gas & Renewable Power Generation)**, since 1970, both in Italy and abroad.

PEG was established in **1998**, but its roots date back further in 1970, within the decennial experience of companies that have merged under its name.

In fact, the heart of the company began from the branch of a business operating in industrial plant engineering, the planning of civil infrastructures, the technical and administrative management of real-estate and territorial information systems.

The Company's professional and intervention capacities were developed thanks to the recruitment of specialized staff who had already worked for important engineering and contracting companies. In **2001** the Company took another important step forwards: thanks to the acquisition of a company having more than thirty years' experience in the field of Oil & Gas and Power, PEG has improved its know-how in executing **EPC Projects in Oil & Gas upstream / Gas & Renewable Power Generation sectors**.

- 1998** Progetti Europa & Global S.p.A. was established in Rome, Italy
- 2012** Established PEG Engineering & Contracting FZCO in Dubai, UAE
- 2015** Registered a Branch office in Iraq
- 2019** Registered a Branch office in Abu Dhabi
- 2021** Registered a Branch office in Libya

Note: *Algeria & Saudi Arabia entities under registration; presence in Uzbekistan & Central Asia, under fast development*
